Tech Interview Specification

Please do the following:

- Parse the JSON in the folder
- Show the UI in a view that can be scrolled vertically by the user (Please see the UI wireframe below)
- Show placeholder UI while the data is loaded
- Add pull to refresh
- Add a button to sort data by start time:
    - Earliest start time first
    - Latest start time first
- Remove duplicate data
- Unit tests

The UI is not so important so feel free to use any sizes, colours, corner radius etc.
Please use an architecture you think is suitable and flexible.
